DOCUMENT RESUME

ED 213 562 RC 013 227

TITLE	Bibliography on Fetal Alcohol Syndrome and Related Issues. Second Edition.
INSTITUTION	All Indian Pueblo Council, Albuquerque, N. Mex.
SPONS AGENCY	Indian Health Service (PHS/HSA), Rockville, MD.
PUB DATE	Jun 81
NOTE	28p.; For related documents, see RC 013 226-228.
EDRS PRICE	MF01/PC02 Plus Postage.
DESCRIPTORS	*Alcoholism; American Indians; *Developmental Disabilities; Drug Use; Infant Behavior; *Infants; Medical Research; *Mothers; Neurological Impairments; Parent Influence; Perinatal Influences; Physical Development; *Physical Disabilities; Pregnancy; *Prenatal Influences; Prevention; Smoking
IDENTIFIERS	*Fetal Alcohol Syndrome

ABSTRACT

The bibliography on Fetal Alcohol Syndrome presents 312 unannotated journal articles for use by professionals working with American Indian people and is designed to serve as a vital source of knowledge on alcohol and child health. The bibliography is intended to list articles on Fetal Alcohol Syndrome and humans, and only highlight a minimal number on the effects of alcohol on experimental animals. The literature, from 1967 to 1980, includes topics such as the effects of alcohol on the fetus; alcoholism during pregnancy; smoking and drug addiction related to an infant's health; cases and history of Fetal Alcohol Syndrome; infants of alcoholic mothers; warning label views; prevention of Fetal Alcohol Syndrome; congenital malformations in offspring of alcoholic mothers; clinical perspectives on the fetal alcohol syndrome; infants of drug addicted mothers; characteristics of the mental development of children of alcoholic mothers; effects of maternal alcohol, nicotine, and caffeine use during pregnancy on infant mental and motor development; psychologic handicaps in children with Fetal Alcohol Syndrome; and IQ in children of recovered alcoholic mothers. The bibliography also includes citations on experimental animals with Fetal Alcohol Syndrome. (ERB)

INTRODUCTION

This bibliography on Fetal Alcohol Syndrome is intended to document much of the growing body of literature on Fetal Alcohol Syndrome. As compiled it was intended to list articles on F.A.S. and humans and only highlight a minimal number on the effects of alcohol on experimental animals.

It is hoped that this bibliography will be of great use to professionals all over Indian country, and serve as a vital source of knowledge on alcohol and child health. In order to facilitate this, copies of most of the articles are available through the F.A.S. project office. We will be glad to send particular items to interested I.H.S., Tribal and other persons. Our address and phone numbers are listed on the cover and below.
